

**Denis Bashkatov**  
**Date of birth:** 25.11.1988  
**Marital Status:** married

## Senior JavaScript Developer

### What I am looking for

I'm looking for full-time long-term cooperation with complex projects in following tech stacks: javascript, typescript, nodejs, devops

### Professional Skills

- **Programming and markup languages:** javascript (es 3,5,6+), typescript, python, html (5), css (3).
- **Software architecture:** oop, basic design patterns.
- **Frameworks and libraries:** Angular 2.0 beta – Angular x.x, React, knockoutjs, angularjs 1.x, redux, apollo-client, video.js, jquery, jasmine, express, mongoose, bootstrap, angular-material, ngrx, ant design.
- **Databases and storages:** BigQuery, firebase, MySQL, MongoDB, Redis, Memcached.
- **Queue management engines:** rabbitmq.
- **Other:** node, pm2, npm, grunt, gulp, phantoms, git, TDD, BDD, docker, docker compose, k8s, zabbix, nginx.

### Work Experience

**Name of employer:** seetree.ai

**Dates of employment:** from Nov 2021 - current time

**Job title:** Senior Fullstack Developer

**Project description and Responsibilities:** This company provides services to hundreds of agricultural companies. For this reason, the most interesting part of the project is working with maps, processing large amounts of data both on the frontend and on the backend.

**Tools and technologies:** React, python, GCP, google cloud functions, big query, nightwatch.js, firebase, mapbox

**Name of employer:** brandlive.com - startup

**Dates of employment:** from June 2020 – Oct 2021

**Job title:** Senior JavaScript (React) Developer

**Project description and Responsibilities:** At this company I develop a great video conferencing product. This product was used to handle 230 events for Joe Biden election campaign.

**Tools and technologies:** React, redux, apollo graphql, video.js

**Name of employer:** RemoteHub.com (OneGlobus.com) - startup

**Dates of employment:** from August 2019 - June 2020

**Job title:** Senior JavaScript (Angular) Developer

**Project description and Responsibilities:** Probably the best technologically developed job marketplace in the web. Very fast and optimized

**Tools and technologies:** Angular 8, angular-universal, angular-material, sass, webrtc

**Name of employer:** Ciklum - Insight Partners

**Dates of employment:** from November 2017 - August 2019

**Job title:** Senior JavaScript (Angular) Developer

**Project description and Responsibilities:** Developing an internal tool for processing surveys for a big investment company, my role at this project is senior front-end developer/tech lead. My responsibilities are to develop front-end for this application and also to develop gateway service written in node.js. The project team includes 2 BE devs, 3 FE devs, and 2 QA. The project has quite an advanced architecture and deployment strategy and utilizes the most recent development methodologies.

**Tools and technologies:** Angular 5, node.js, muicss, sass, express

**Name of employer:** BAAZ

**Dates of employment:** from January 2017 - to November 2017

**Job title:** Senior javascript/typescript developer

**Project description and Responsibilities:** Developing of huge social networks aggregator ([baaz.com](http://baaz.com)) using Angular 2-4 framework and typescript. My position includes adjusting architecture and solving vital technical problems of this project, one of my duties is to try to always take the most complex tasks. Also one of my responsibilities is to develop and maintain prerendering microservice and real-time notification service developed with Node. One of the important tasks I've implemented was to perform migration from Angular 2 RC 4 to Angular 4.3.2, this is quite a complex task because these two versions differ greatly and baaz web app includes more than 400 components.

**Tools and technologies:** angular 4.3.2, typescript, webpack, gulp, sass, BEM, node.js, expressjs, pm2, jasmine, karma and few more

**Name of employer:** Ciklum - Cashcloud

**Dates of employment:** from May 2014 - to December 2016

**Job title:** Senior Fullstack Developer

**Project description and Responsibilities:** Development of system which consists of few different components: PHP API (Yii 1.x), legacy web application, new single page web app (angularjs 1.x, Bootstrap 3, less, gulp, ...), payment widget (angularjs 1.x). Also, php API provides data for legacy mobile app(marmalade), and two new native mobile apps. My contribution to this project was implementing merchant widget, web app, back office app (angular 1/javascript/sass/gulp/jasmine) and also implementing new API features. Also, I had experience in a scrum master role in this project.

**Tools and technologies:** php api (yii 1.x), angularjs 1.x, bootstrap 3, less, sass, gulp, jasmine

**Name of employer:** Ciklum - Dibs Payment Services

**Dates of employment:** from June 2012 - to April

2014 **Job title:** Frontend javascript developer

**Project description and Responsibilities:** Development of rich front-end web app with the support of a wide range of devices (ios, android 4+ tablets, and phone, all desktop browsers). Was involved both in front-end and back-end(PHP) development of this application.

Brief structure of this web application: all logic is on front-end, PHP part is responsible for some back-end validation, WebSocket messaging, caching and getting data from Java API via soap.

**Tools and technologies:** html5, css3, php5, javascript, WebSockets, knockoutjs, jquery, jasmine, bootstrap, symfony2, ratchet, PHPUnit, redis.

**Name of employer:** [908.vc](http://908.vc)

**Dates of employment:** from June 2011 - to June 2012

**Job title:** PHP developer

**Project description and Responsibilities:** Development of three high-loaded web applications:

1.) [audiko.net](http://audiko.net) – the best ringtone creator on the web, about 1600000 hits per day.

Technologies used: HTML, CSS, php5, javascript, Zend framework 1, JQuery, MySQL, Redis, Memcached, Facebook API, nginx.

2.) [klumba.ua](http://klumba.ua) – the biggest social network for young parents in Ukraine, about 1500000 hits per day.

Technologies used: HTML, CSS, php5, javascript, Zend framework 1, JQuery, MySQL, Memcached, Sphinx, nginx.

3.) picrolla – app for [vk.com](http://vk.com) social network which allows users to create videos from their photo albums and soundtracks. It's a single page app.

Technologies used: HTML, CSS, javascript, jquery, MySQL, php5, FFmpeg, nginx.

## **Education**

**Dates of studying:** from September 2006 - to August 2011

**Name of institution:** Dnipropetrovsk National University

**Degree and major:** MS, Applied Mathematics and Mechanics
